## BLAZE

Stylish sunglasses in a classic, timeless model. frame in a stylish matte black finish and temples with inserts in gray rubber details for maximum comfort. Fits just as well on boy as girl and young as old. The lenses that have a certain mirror effect are of category 3, which is excellent on sunny days when they let in only about 8-18% of the UV light. Meets ISO 12312-1 and of course has UV400 protection.

# CAPRI

Wide style, clear view.

Sunglasses with space for your message.

*Stilo*

417-001 black

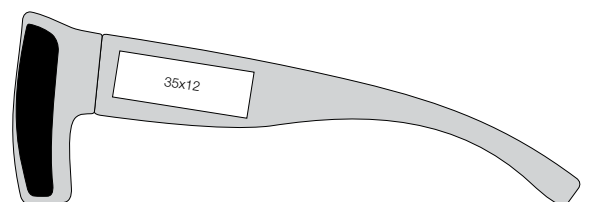

416-101 basic/black

416-001 premium/black

NOTE! Don't forget to buy a storage bag for your sunglasses!

## CAPRI

Sunglasses in a modern and trendy style with slightly larger and more angular frames. The model fits just as well in the bustle of the city as in the sun lounge on the beach. The wide temple fulfills several practical functions. Here you don't have to be shy, here it's fine to choose a relatively large marking for maximum exposure. At the same time, the eyes are extra well protected against the sun's rays from the side. The smoke-colored lenses are of category 3, which is excellent on sunny days when they let in only about 8-18% of the UV light. These sunglasses meet ISO 12312-1 and of course have UV400 protection.

415-301 black

416-101 basic/black

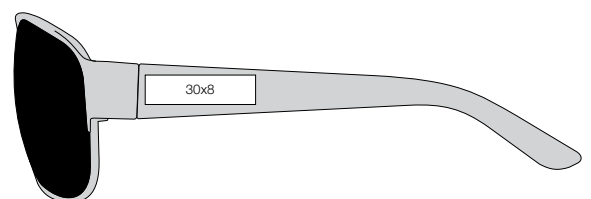

416-001 premium/black

NOTE! Don't forget to buy a storage bag for your sunglasses!

## RACE

Stylish model with silver metal frames and black plastic arms. The lenses are in category 3. These sunglasses meet ISO 12312-1 and of course have UV400 protection.

415-201 black

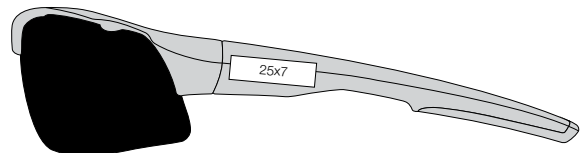

416-101 basic/black

416-001 premium/black

NOTE! Don't forget to buy a storage bag for your sunglasses!

## SPORT

So that the sunglasses do not bob up and down when, for example, running, it is important that they do not weigh too much. Our model "Sport" weighs only 28g and has a rubber nose piece for the best comfort and fit. Also a must on the ski slopes or during other winter activities. By the way, did you know that snow reflects approx. 90% more of the sunlight than the surroundings do in the summer? Even on the bike ride, there are several advantages to using sunglasses in addition to sun protection. They also work very well as wind protection for your eyes. In addition, it is fantastic to avoid, for example, pollen or airborne particles in the eyes? A stylish, sporty and very comfortable model for your active leisure time. Equally useful in summer and winter. The lenses that have some mirror effect are of category 3. Comply with ISO 12312-1 and of course have UV400 protection.

# SKY

Classic pilot glasses with a modern edge.
